Connor Jones

Software Engineer

connor@turbojones.com | Tucson, AZ | linkedin.com/in/connor-jones-a4571a132

PROFESSIONAL OVERVIEW

Software engineer specializing in React and TypeScript with experience building and maintaining complex enterprise web applications. Skilled in reusable UI architecture, data-intensive interfaces, API integration, and cross-stack troubleshooting with C#, ASP.NET, and SQL Server. Background in product design and end-to-end freelance delivery.

WORK EXPERIENCE

Software Engineer | Titan Cloud Software

May 2024 - Oct 2026

- Built reusable interfaces, complex data grids, filtering, selection, and visualization features with KendoReact and Highcharts.
- Integrated REST APIs and collaborated on C#/ASP.NET and SQL Server workflows; investigated bugs spanning front-end and back-end systems.
- Improved performance and usability in data-heavy interfaces, including server-side paging, loading states, and request handling.

Lead Front-End Developer | Bluewell

Sep 2021 - Feb 2023

- Led front-end development and UI design for a legal-referral platform, working with engineering leadership to bring the MVP to market.
- Built responsive application features and refined workflows using usability feedback and user data from the ground up.
- Worked with the back-end team to optimize load times and ensure a smooth user experience across the application.

Freelance Front-End Developer | Self-Employed

Mar 2018 - Jan 2022

- Delivered client websites and web applications, from requirements and wireframes through development and deployment.
- Built interactive interfaces with React, JavaScript, and CSS; managed timelines and project requirements.
- Worked alongside clients to produce branding, marketing materials, and optimized web interfaces for increased conversion and reduced bounce rate.

Junior Front-End Developer | Automatit

Sep 2017 - Feb 2018

- Implemented websites from design mockups with front-end and back-end teams under tight delivery timelines.
- Learned basics of CRUD operations and database interaction across the stack.

SKILLS

React, TypeScript, CSS/SCSS, REST APIs, data visualization, C#, ASP.NET, SQL Server, AWS Lambda, S3, ECS, performance optimization, cross-team collaboration.
